aptum

MAXIMIZE THE VALUE OF YOUR DATA INFRASTRUCTURE

As businesses face exponentially expanding volumes of information, punctuated by fast-evolving customer requirements, Aptum helps maximize the value of their data.

Adaptability is key to our success in meeting the evolving needs of our customers. We leverage the potential of technology to solve their business challenges.

TRUE HYBRID INFRASTRUCTURE SOLUTIONS

Aptum's capabilities span multi-cloud, data center, hosting and connectivity to enable delivery of true hybrid solutions that address even the most complex requirements. All supported by deep technical expertise and professional services.

DATA CENTER SERVICES

Aptum's 14 carrier-neutral data centers across North America and Europe provide highly secure, reliable bandwidth with scalability to meet any business demands
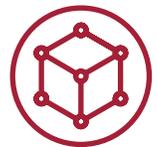

From a single rack to cabinets, cages and suites, Aptum data centers provide design flexibility, connectivity alternatives and the highest levels of security and compliance.

Make colocation a cornerstone of a hybrid IT strategy. When you choose to colocate your critical applications with Aptum, you gain access to our cloud, hosting and security services, along with the ability to seamlessly connect your colocated workloads to hyperscale clouds, third-party services and your on-premise IT.

CONNECTIVITY SERVICES

Deliver the application performance and user experience your business demands with high performing, secure connectivity solutions from networking specialists

Aptum offers a range of connectivity options supported by deep expertise in network engineering to help design, build and operate connectivity solutions with performance, security and investment suited to your unique needs. With a 3,400 km dense metro network in Toronto and Montreal plus a 48,000 km managed fiber network across North America and Europe, Aptum's connectivity solutions deliver high performance and exceptional user experience.

- MPLS – Ethernet and IP VPN
- Dedicated Internet Access
- Wavelength
- SD-WAN
- Cloud Connect
- Content Delivery Network (CDN)

MANAGED CLOUD SERVICES

Expertise across public, private and hybrid cloud means Aptum can help you navigate your cloud journey and optimize your cloud investments

Aptum takes an end-to-end approach to cloud solutions, ensuring you make the best platform choices with consideration for connectivity, security and ongoing management in the solution design.

With services spanning consultation, design/build, migration, day-to-day management and optimization, our expertise covers Azure, O365, AWS and VMware Private Cloud solutions.
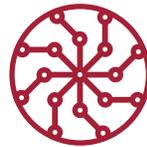

MANAGED HOSTING SOLUTIONS

The ultimate in control, performance and flexibility when you simply cannot compromise on infrastructure for mission-critical workloads

Managed Hosting from Aptum is much more than a cutting-edge server, storage, network and security technology. It gives you access to deep technical expertise built over 20 years. Aptum architects and support teams work with our customers at every step, from initial consultation through solution design, migration, ongoing system management, and optimization. All backed by expert 24/7 support.

PROFESSIONAL SERVICES

Guidance, advice and expertise to help shape and drive IT transformation

The journey to modernize your IT infrastructure and transfer workloads to cloud and hosted platforms can be complex. From platform choice to solution design, migration planning, and ongoing optimization, the importance of expert guidance and support has never been greater.

Whether you are undertaking a build, migration or upgrade – complex or simple – Aptum's professional IT project management services ensure your initiatives are delivered on time, on budget, and with less stress on your team.

Our key professional services include:

- Assessment and consultation
- Design and build
- Migration
- Solution optimization
- Database administration
- Project management
